SCHOOL FAIR MEETING HELD

A meeting was held on Saturday, March 7th at 2 p.m. to complete reorganization of the Chinook and District School Fair for the year of 1936, with Mr. Marcy as chairman.

The minutes of last meeting were read and adopted upon the motion of W. A. Todd Mrs. Shier.

(1) Nominations for President
 (a) Todd-Hutchison
 Nominated Mr. Marcy
 (b) Mrs. Shier-Miss Jensen, that nominations close.
 Mr. Marcy elected by acclamation,

(2) Vice President
 (a) Connor-Hutchison, nominated Mt. Todd.
 (b) Mr. Haggerty - Mrs. R. Stewart, that nominations close.

Mr. Todd elected by acclamation.

Warren-Todd - that this meeting endorse the appointment of the following directors made by the School District and Inspector:

Laughlin	Mrs. R. Stewart
Keystone	Mr. Payne
Vyrtle	Mr. Haggerty
Collholme	Mrs. Wilson
Swan	Mr. Cout's
Peyton	Mrs. Shier
Heathdale	Mr. C. Gillette
Clover Leaf	Mr. E. B. Allen
Chinook	Miss Jensen, Mrs. Cooley, W. A. Todd and H. D. Connor.

(4) Secretary-Treasurer!
 (a) Mrs. Shier-Mrs. Stewart - Miss Otto, salary of \$15.00

Mrs. Shier-Mrs. Wilson, that the entry fee per school be \$5.00

Todd-Connor, that the Sec. write to outside Companies for donations to the S. Fair.
 Mrs. Shier - Mrs. Stewart, that W. Todd, Mrs. Cooley and Miss Jensen be a committee to solicit donations from the business men.

Mrs. Shier-Mr. Warren, that the Sec. be authorized to deposit all School Fair funds in the Royal Bank at Cereal and that the Pres. and Sec. have authority to withdraw Hutchison-Todd, that directors having children exhibiting in the S. Fair be excluded from the hall during the judging. Lost

(To be Continued)

Mr. D. W. McFee left on Tuesday morning for Calgary where he will spend the week

Mr. Eric White left Tuesday morning on a business trip to Calgary.

A Card Party and Dance will be held by Chinook W. I. in the School Auditorium on Friday, April 3rd.
 Admission 25 cents, including lunch
 Excel Orchestra.

Miss Honor Langley who was visiting with her parents, returned to Calgary this week

The Smithsonian Institution has a collection of 100 species of rat fish. These fish are so-called because of their rat-like tails.

Soap Royal Crown	10 bars	.39c
Corn flakes Quaker or Sugar Cr.	3	.25c
\$ Sodas \$.39c
Jam pure Plum	per pail	.39c
Baking Powder -- Braids		.19c
Oranges good size	3 doz.	.63c
Lemons	per doz.	.33c
Cooking Figs	4 lbs.	.39c

CANADIAN NATIONAL RAILWAYS (S. W. Fairweather)

Continued from last week

During the worst of the depression years 1931, 1932 and 1933, the property just missed doing this, but did not provide more than sufficient to meet all its cash expenses, except interest. In 1934 a slight return on invested capital account resulted from the improvement in business conditions, and the 1935 result is again somewhat better.

This view of the Canadian National may be a little startling, but it is the sober truth, and when I make this statement it is with no allowance for the fact previously mentioned that a considerable portion of the property of the Canadian National was never designed to operate for profit. The return upon the total invested capital prior to the depression is ranged from 7 per cent to 23 per cent and if a correction is made for the invested capital on properties not designed to be operated at a profit the return on the balance of the property would range from 13 per cent to 31 per cent, and mark this upon the total investment without the write down of one dollar representing the adjustment in the capital structure which might properly have reflected the virtual bankruptcy of the properties at the time they were taken over.

You see there is one difference between public and private ownership. Private ownership can draw a decently carbonized sheet of bankruptcy proceedings over its mistakes and start afresh with the property on a recapitalized basis with past mistakes forgotten and forgiven except perhaps by the investors who lost their shirts in the process. The Canadian however, like Christiaan in "Pilgrim's Progress", must bear the burden not only of its own mistakes but also suffer for the sins of predecessor private companies.

Bring in your hides and horsehair. Highest prices.

Chinook Meat Market

HARD TO SATISFY

The Grain Trade in Great Britain complained when John I. McFarland held Canadian prices above other export countries by criticizing James Murray, claiming that the policy of the new Board is causing wheat to decline unnecessarily.

British millers too, are "hopped up" over the suggestion that Canadian flour might be given special consideration by the Canadian Wheat Board.

Canadian flour millers have been suggesting this for some time but if the Board does this to them they will lose their preference for Canadian flour in the British market.

The British Baker, a leading bakery journal in the United Kingdom, calls the Canadian Wheat Pool and John I. McFarland robbers of the poor by trying to get a decent price for Canadian wheat farmers. As it takes a four-shilling rise in the price of flour to increase the 4-lb. loaf one cent.

It is difficult to calculate how the British consumers have been robbed very much. Do they want Canadian wheat for nothing?

Installment buying has been declared illegal in Egypt.

"COST ITS WEIGHT IN GOLD"

At one of the conferences held by the International Wheat Committee, a delegate from Switzerland explained that although wheat is grown at high altitudes and on poor soil in his country, the Swiss government felt that growers should have government protection and financial assistance in order to enable them to continue in their profitless enterprise. The subsidizing of low grade wheat at an enormous cost per bushel is part of the Swiss policy, the explanation of which moved a British expert present at the meeting to the composition of the following verse:

Red is the wheat de-natured

On which the fowl is fed;

Red is the impeding ruin

About the farmer's head;

Red glow Helveta's harvests

Amid the glacier's cold

Where every frozen wheat ear

Has cost its weight in gold.

What About State Medicine?

State medicine as a solution of the "cost of health" problem is a subject very much in air in Western Canada. It provokes just now and probably a very short time before state medicine or public health insurance, in whole or part, will be in effect generally in the west.

It is perhaps not surprising that the public mind is rapidly crystallizing in this direction. A number of factors are responsible for this. One of them is the much publicized depression of the past few years. During this period local governments have found it necessary to provide medical and hospital care for a large number of relief recipients and, of course, the cost has had to be passed on to the taxpayers.

In addition to that, very many of these taxpayers have during the past few years found it increasingly difficult to keep pace with growing tax bills and the same time stand the expense of hospital and medical bills for themselves and other members of their families, for they have found that medical and hospitalization expenses have not declined in proportion to their own incomes.

Further than that all classes of the community are demanding a high standard of medical and hospital service. The hospitals that are best endeavoring to cater to this demand find that they cannot continue to operate at a loss and, therefore, present a financial problem. The collecting accounts and the doctors declare that they cannot afford to reduce their fees to a scale commensurate to the pocketbooks of their clients because they, too, find the percentage of accounts which can collect from paying patients diminishing.

With this situation staring them in the face people generally are turning to the question of state medicine as a way around these difficulties and the move is receiving support from at least some of the members of the medical profession.

The question, however, is a big one and bristles with many features which deserve full consideration before the plunge is made. While state medicine undoubtedly offers advantages there are some phases which should be considered.

Not the least of these is the question of cost and how it is to be distributed. In other words who is to provide the means and from what sources. It would also be the part of wisdom to ascertain with reasonable certainty that the advantages which the most enthusiastic advocates of state medical claim for it can be realized in full degree before a complete scheme is adopted and whether the benefits are likely to be commensurate with the cost.

British Columbia and Alberta governments are both discussing health insurance schemes of more or less provincial scope and considerable pressure is being brought on the Saskatchewan government to adopt a scheme with prospects that before the legislature now in session adjourns, some consideration will be given to the matter.

The British Columbia plan provides for partial medical, hospital and dental services for certain specified classes of the community. Yet the total outlay is estimated at \$7,237,500 a year or \$12.50 per person. The amount to be contributed by the provincial government is limited, which may result in curtailment of the benefits and hospital services is limited to 100 days.

The Alberta Health Insurance Act, passed by the former legislature, but not yet brought into operation by proclamation, is based on the local option principle. In other words it can be brought into effect in any district in which the majority of the electors so desire by vote.

The Alberta measure provides for full medical, dental, hospital and nursing services without some of the limitations prescribed in the B.C. plan, but the total estimated cost is \$14.50 per person per annum, of which the district would contribute by local taxation \$1.28 and the province \$3.22.

Varying estimates have been made of the cost of the full scheme for Saskatchewan, ranging from \$8,365,000 to \$6,786,000 for a service exclusively for farmers and members of their families, the latter figure being quoted by the Agricultural extension organizations, provided a similar plan to that proposed in Alberta were adopted.

Even on the basis of the latter total expenditure, the average annual cost per municipality, it was found, would be \$22,472, involving a municipal tax levy for that purpose alone, above or below ten mills depending upon assessment and population.

On these figures, however, and remembering the depleted state of provincial and municipal treasuries and the difficulty of collecting taxes under conditions which have existed in recent years it would appear reasonable to suppose that no complete scheme could be financially successful without some assistance from the Federal government or unless some other source of revenue than the land within the province adopting such measure can be found.

Taking all circumstances into consideration it might be wise, if the adventure is to be made, to try it out on an experimental basis, either by applying a complete scheme to a group of municipalities or district with the provincial government guaranteeing a deficit or by applying a partial service to an entire province. A test on some such basis would yield practical information as to when and how far further extensions could safely be made.

Chief Slept Through Fire
"Deep in the Sleep" might well be the title of this little story. John Andriessen celebrated his election as chief of the volunteer fire brigade at Anchorage, Alaska, by sleeping through the first fire. The station siren aroused the whole town but not the chief, just a block away. His wife, a night telephone operator on duty, couldn't raise him either.

Give a man rope enough and he may be able to get his car going.

Purity Flour

Would Scrap Auto Horns

Not Needed With Good Brake

Opinion Of Careful Driver
I have been closely connected with the building of automobiles and everything that goes with them for more than 30 years. I have driven over all the United States and Canada and never had an accident. Never had a traffic violation ticket of any kind. Modestly, I believe that I am competent and qualified to ask questions.

Why not scrap the horn and remove it from all cars except police, fire trucks and ambulances? The horn has proved to be a menace and everyone would be better off without it.

The brake takes the place of the horn on my car at all times. For any argument in favor of the horn, my answer is: Press on the brake first.—Letter in Detroit Free Press.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' To Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not passed out of the body, it stays in the liver. You get constipated, feel fatigued, your stomach aches, your appetite is lost, your skin looks sick.

A simple way to wake up the liver always gets at the cause. You need something that works on the liver as well. It takes those old, old Chinese herbs. They contain 100 pounds of bile flowing freely and make you feel good. You can take them in capsules to make the bile flow freely. They do the work of calcium, but have no calcium or mercury in them. They are safe. They are natural. Name! Stammer! Stubborn! refuse anything else.

Stamp Must Be Requested

If Properly Tagged Return Poultry Crates Not Dutiable

With regard to the export of live poultry from Canada to the United States, there is no duty charged on properly marked return crates, but a duty of 30 cents per crate is charged Canadian shippers on the return of their crates into Canada, unless, prior to shipping the poultry to the United States, the Canadian shipper has the crates properly tagged by a Canadian Customs official as being of Canadian manufacture. A Customs stamp is placed by the Customs officer on wooden crates, and a metal seal is attached to metal crates. In order to have this stamp placed on the crates, it must be requested by the Canadian shipper.

MAKE YOUR OPPORTUNITY

Wait until we are employed about more trade and more money to spend, now's the time to make the most opportunities—for Shakespear wrote, "There is a tide in the affairs of men, which takes us not in despite of our will."

Obviously this is a time to make the opportunity, not wait for it, and since have the desire, and lack the urge to do so, then their stock of nerve force is dangerously low, and should immediately begin to use the necessary working power level with Phosphorine.

As always, the race is to the strong, and the energetic, and "Phosphorine" means that one really holds one's own in competition with others. The origin of most failures, disabilities, and infirmities, is deficiency of nerve force, which a short course of Phosphorine soon replaces with stamina to make your opportunity!

Old House May Be Sold

Late King George Visited It In Halifax 40 Years Ago

Ware House, at Cole Harbour, a few miles from Halifax, which the late King George visited as a Midshipman 40 years ago, and which once rang with royal voices, will be advertised for sale and removed unless someone will undertake the expense of restoring the property. The Halifax town council has decided.

Years ago the Ware family sold the house and went to the Canadian west. The property was purchased by the County of Halifax and used as a residence for the caretaker of the County's Poor Home, nearby. When the home was burned down, it was abandoned.

Had To Trade Properly

Owners Arranged Matter When House Put On Wrong Lot
Milton Brenner, councilman of Pasadena, Calif., went to see a lot he just had purchased and rubbed his eyes.

On the lot was a house and Brenner was certain that two days before there had been no house there.

Investigation revealed a house owner had delivered the home to the wrong address.

It should have been placed on a lot next door, so Mr. Brenner and the home owner just traded their property.

More than 42 per cent of the sales of farm products are made during September, October, and November.

Increases Brain Pressure

Doctors Claim Noise Adds As Much As 400 Per Cent

Noise increases the pressure on the brain, sometimes as much as 400 percent, and causes loss of temper, irritability and undue exitation, a symposium on "The Effect of Noise in Health and Disease" at the New York Academy of Medicine revealed.

Experiments at Bellevue hospital which measured brain pressure were described by Dr. Foster Kennedy, professor of neurology at Cornell University Medical College, who found that exploding an inflated paper bag increased the brain pressure to four times normal.

Dr. E. P. Fowler warned that many of New York City's very loud noises endangered the ear drum membranes.

Riel Rebellion Veteran

Man Who Saw Boom Days In West Dies At Halifax

Fredrick Lester Ray, native of Quebec City who went to Canada's west in the day of its boom and became a prominent rancher, died at Halifax recently in the home for aged men at the age of 82.

He was a veteran of the Riel rebellion and his entire property was destroyed in one of its encounters. At the end of the rebellion he returned to Halifax, where his father had brought him in 1873, and remained there the rest of his life.

Glass wool can now be made so fine that 100 fibres of the glass make a thread no thicker than ordinary No. 50 cotton.

Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well Being to Unknown Preparations

BEFORE you take any preparation, wait until we are employed about more trade and more money to spend, now's the time to make the most opportunities—for Shakespear wrote, "There is a tide in the affairs of men, which takes us not in despite of our will."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Couple thousands of people who have taken "Aspirin" year in and out without ill effect, have proven that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is registered trademark of the Bayer Company Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

FLEMING'S FOLLY

BY LAWRENCE A. HEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Ron King, the boss of the Rawhide and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Soak Torney, the attorney, to end his speech. Kilgo knew what he had failed up to give his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone County was only a new-fangled way to waste money.

The meeting terminates, but Buzz Hamilton, his son, and his brother, Bill, and Kilgo stay back. Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence him after he has already decided against it. Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is injured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own project.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for him and Helen. He finds out what can be done.

Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plants and renders Link unconscious.

He is rescued from the blaze by an employee.

Helen and Link ride to Rawhide for supplies and to obtain funds to carry out their plan. They meet Roger, who gives Helen and offers to shop with her. Link goes to see the Sheriff, who tells him Buzz Hamilton has been paroled, and who is now working for the government, but that he thinks Link has made a mistake in getting Buzz released.

(Now Go On With the Story)

CHAPTER IX.—Continued

"You, no bet! Me and Marty Bush swore off a couple of years ago."

Slowly she wheeled her pinto. "I thought perhaps you meant to try to win money to help us out. Because we are still in danger of being unable to finish the dam, aren't we?"

Link avoided her look as he shrugged his shoulders. "Some. But playin' to win means you're sure to lose. No, Helen, I'm stakin' to fix a treat that'll sure tickle you. Nope, can't tell you now. Wait an hour or two. So long!"

He stood in the thick dust watching her ride away. Then with a look of fondness, the source of which was considerably deeper than casual friendship, he started for the spot where Sheriff Stephen stood waiting. "Buzz came on the stage while you

Mother's Aided by Guide to Better Control of Colds

Practical Plan Is Helping Families Everywhere to Have Fewer, Milder and Shorter Colds.

SIMPLE AND EASY TO FOLLOW

Already, thousands of Canadian mothers are benefiting by following Vicks Plan for Better Control of Colds—proving for themselves that it is a practical home guide to fewer, milder and shorter colds. This commonsense, medically sound Plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians and further proven in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan:

1. To Prevent a Cold.

Live normally—avoid excesses.

Eat simple food and keep elimination regular. Drink plenty of water.

Take some exercise daily—outdoors preferably. Get plenty of rest, especially at night.

2. To Help Prevent Many Colds

At the first warning nasal irritation, sniffle or sneeze, use Vicks Va-tro-nol—just a few drops up each nostril. Va-tro-nol is especially designed for the continual upper throat—where most colds start. Used in time, Va-tro-nol helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner

If a cold has developed or strikes without warning, run throat and chest at bedtime with Vicks Vapo-Rub. Vapo-Rub acts almost at once: (1) By saturation of the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, the loosened mucus—plus active action phlegm—soothes irritation, helps break congestion.

What Vicks Plan can do for you and your family can be proved only by trying it. Directions for following the Plan come in each package of Vicks Va-tro-nol and Vicks Vapo-Rub.

were in the bank," the official notified. "I tried to stall but Jackpot Mell an' Kilgo came along an' made a fuss over Buzz an' insisted he have a drink with 'em. The hell gang is in the Half Moon now."

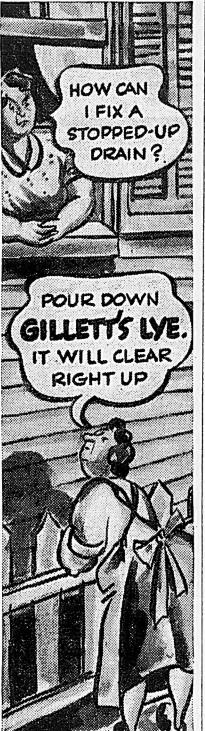

Furrows grooved Flemings dark forehead as he surveyed the two-story false front of the saloon. "Doggone it!" he exclaimed irritably, "those hombres don't care what they do to a youngster. Of course, Buzz is only a two years younger m—he's twenty-one. But he seems like a kid, Sheriff, that's got to be watched all the time. This'll be a fine start for a chap just paroled from prison!"

"Helen's dont know he's here?"

Link shook his head. "I sent her home. Now," he said reluctantly, starting away, "I've got to separate Buzz from them vultures and get him out to the Triple H. Ames, it might be better if you didn't come, all the time. Buzz probably saw all the lawmen at prison he cares to see for quite a spell."

"I'll let 'im alone so long's he don't go have another shootin' match. Tell Buzz I said so." And the rough friend moved off.

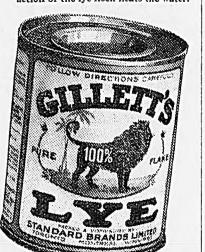

Through a friend at the state capitol Link had managed to have Buzz paroled after serving six

QUICKLY FREES PIPES from clogging matter

Use Gillette's Pure Flake Lye regularly and you'll keep sink drains, tubs and toilets running freely. Each week pour it down full strength—it will not harm enamel or plumbing. * To remove lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillette Lye Booklet shows you practical ways to fight many household chores with this powerful cleanser and disinfectant. It tells how to use Gillette's Lye for these cleaning in and around farm buildings . . . gives complete instructions for making insect repellent soap . . . and much more. Write to Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Mr. CAFFEINE-NERVES . . . he gets expelled from school

months of the three year sentence. Fleming had gone to this trouble merely to please Helen, for with a sister's fondness for an errant brother, she was unusually attached to Buzz. So much so, in fact, that she never thought of him as a criminal and a weakling, but as a youth who had been unfortunate in his choice of companions. It was Helen's ambition, Link knew, to see Buzz make a man of himself so that she could one day yield him the Triple H to manage again, or divide their spread and surrender his share.

Moodily reviewing these facts, he strode inside the Half Moon. As the swinging doors flapped behind him several loafers glanced up with idle interest. Recognizing him, they exchanged significant looks and their eyes strayed to a large wall tabl

where five men sat playing cards. With something of a shock he realized the ex-convict for whose actions he was now responsible. Grey prison palor had dissipated his former healthy tan and Buzz Hamilton's thin face was lined beyond his years. A furrow, hangdog expression persisted on his features and he had lost weight until he was almost scrawny. Loose ill-made prison clothes hung in wrinkles about his scarcely fleshed body. The newcomer's whole appearance was little less than shocking.

Fleming's eyes caught those of the ex-convict and he forced a welcoming smile as he strode the few steps to the table. "Howdy, Buzz! Glad you're back. Say, you're looking good," he said glibly. "Helen'll shore be glad—recon you there's nothing she's wanted more than to have your help on that old Triple H spread!"

The other's gaze fell. "I spose yous are glad to see me. Got things fixed to suit yourself, Fleming, so why shouldn't yuh be?"

Utterly taken back by this reply, Link frowned. "What do you mean, Buzz?" "Couse I glad to see you! Best part is," he chuckled, striving to win enthusiasm from those lack-luster eyes. "Helen doesn't know a thing about it. She'll be tickled when you ride up! Shall we start now?" he suggested.

(To Be Continued)

Hale Selassie, according to the news dispatches, goes without his regular meals one day a week. One would think that a queen would long to move than one bridge club.

The Croydon, Surrey, Eng., library collects an average of \$500 monthly in fines imposed for keeping books over time.

Home Of The Future

University Professor Sees It As Vacuum Bottle Type

A house built on the vacuum bottle principle may be the forerunner, a Northeastern University professor said, of the air conditioned home of the future.

Its walls are 14 inches thick, its windows never open and its heating system functions without registers or radiators.

Frederick Stearns, assistant professor of mechanical engineering at Boston University, has had an observation for a year. During that time, he said, because of the automatic air conditioning system built into the dwelling, inside temperature and humidity have remained practically constant regardless of outside conditions.

In the heyday of the Volga river in Russia, 25,000 barges piled the river.

Gold was found in a meteorite which fell in New Mexico several years ago.

Science Graduates Lucky

Electrical Engineers Have Least Difficulty In Securing Jobs

Prospects are good that all 176 members of the graduating class in the Faculty of Applied Sciences at the University of Toronto will find positions this spring, Brig.-Gen. C. H. Mitchell, dean of the faculty, said.

Employment was found for last year's class of 160 with little difficulty. Electrical engineers are in demand, followed by mechanical, mining and metallurgical engineers, with chemical engineers last.

Instant Relief From ITCHING

Are you tormented with the itching tortures of eruptions, eczema, scales, rashes or other skin afflictions? For quick and happy relief turn to D. D. D. Prescription. Its gentle oils soothe the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss or bother—just apply directly to the skin—dries up almost immediately. Since the most intense itching instantly. A 35c trial bottle, at drug stores, will prove it—or money back. D. D. Prescription is made by the owners of ITALIAN BALM.

A Morgan horse resembles Arabian horses in having only five lumbar vertebrae, instead of six, which is one reason for believing that the Morgan horse has Arabian ancestry.

Quebec Winter Sport Mecca

Premier dog-racing event in North America, the International Dog Derby at Quebec City on February 25th, will draw sportsmen from Canada and the United States to see the leading mushers of the two countries in competition and to enjoy the skiing, tobogganing, skating, and curling centring around the famous Chateau Frontenac. An interesting duel is expected this year between Harry Wheeler, of St. Jovite in the Laurentians, champion last year, and Ovide Carriere, of Quebec City, who defeated Wheeler this year in Laconia, New Hampshire annual derby. A startling contrast to this event in Eastern Canada is the annual golf competition held about the same time at Victoria, B.C., in the Evergreen Playground of the West. Both are sponsored by the Canadian Pacific Railway.

WEATHER BULLETIN

Week of March 16 to 22, 1926

Thursday, March 19.—In most sections moderating temperatures and fairly clear weather, though in Manitoba country sudden temperature variations and slightly disturbed.

Friday, March 20.—Except about Peaceville southwest most of country clear, with temperatures fairly mild, though quite variable in eastern sections.

Saturday, March 21.—Some disturbance about Peaceville southwest, southwest central provinces and along the northern borders, with light rains and snows, slightly warmer in most sections.

Sunday, March 22.—Unsettled about southwest and on southern borders, with generally moderating temperatures and Pacific southwest rainy.

Week of March 16 to 22, in central provinces begins with a spell of cold weather in west, while about eastern regions becomes considerably warmer, though quite variable. In most sections temperatures rise all week in western areas, like a very cold spell of a day or two near 19 or 20, but soon more moderate. Some rain about Pacific southwest and disturbance with light snowing along southern borders, yet in general not much precipitation until near the third week of April, when springlike weather comes.

After the middle of March in these regions temperatures are expected to rise to higher than the general seasonal levels and in most sections fairly moderate weather should come on carrying rains in the Pacific southwest which drift across as scattering snow to the central regions and to southwest. Practically now becomes rather heavier than in the winter months and comes on generally at times of storm disturbances, with clearing spells following the snow flurries. The mean temperature for March in these regions is below the freezing point, but around 22nd or 23rd a probable intermittent thawing and freezing spell begin and last until near the third week of April, when springlike weather comes.

For Week Beginning March 15, 1926 Temperatures Warm Mild Cold

Mon.	16
Tues.	17
Wed.	18
Thurs.	19
Fri.	20
Sat.	21
Sun.	22

This is for northwest regions; maxima and minima occur 1 day later about central regions; 2 days later near the Great Lakes and 3 days later on Atlantic coast.

SOME STRAIGHT TALK

R. A. Wright of Drinkwater, Sask. president of the Western Canada Livestock Union, in a recent public statement said the only way markets for surplus agricultural products of Western Canada, such as cattle and wheat, could be obtained was by a downward movement of prices to allow a free distribution of goods.

The farmer is under no obligation, economic or social, to turn out a profitless volume of crops for the profit of others, he said. Agriculture is not an insurance company issuing an insurance policy on food supplies without the payment of a premium.

An American with high tariff throttling international trade, afflicting us with a surplus of wheat, has almost destroyed the wheat grower and has reacted to the detriment of industry, commerce and labour who are inescapably tied up in the welfare of agriculture?

If this is to continue, Mr. Wright said, we cannot blame the farmer if he turns to government intervention, controlled production, fixed prices, bonuses and subsidies, all of which we know are fundamentally wrong, but the farmer believes it is a poor rule that won't work both ways. Business thirst for free business does not go so far as to embrace the free admission of foreign and Empire products produced more cheaply and therefore saleable to a large number of people. If prices of farm products cannot be raised beyond the tariff wall, the tariff wall must be lowered so that imports shall bring down the price of manufactured goods.

SEEKS MINIMUM GRAIN PRICE

Victor Quelch, Social Credit member for Acadia Valley riding in Alberta, moved a resolution in the House of Commons to provide for minimum prices for grains produced in Western Canada. He insisted that grain had been produced below cost and that the situation must be remedied. Other nations were spending millions to maintain high internal prices for agricultural products so Canada could not be called over-generous or over-protective in this respect. The action of the government in establishing a Wheat Board and a minimum price for wheat had to a very large extent restored the confidence of the grain farmer. He hoped the Board will be kept on.

The Chinese government has sold 100,000,000 ounces of silver to the United States treasury recently, it was understood. This represents a value of almost \$50,000,000.
